Like many other security workers, Hill has special training in reading faces. She looks for microexpressions. These are very small changes on a person's face. They know the person's thoughts or feelings. Microexpressions can often tell you more about people's feelings than their behavior can. Everyone can read some emotions on people's faces we can see surprise with eyebrows go up. We can see happiness when mouth and eyes change. A psychology professor named Paul Ekman asked himself a question: do people from different cultures read faces in the same way? He found that everyone understands many facial expressions in the same way.

Did you know that many inventions began as accidents? Some of these accidents even became big business ideas. They gave us products that people all over the world use every day. In 1886 in the United States, a pharmacist' named Dr. John Pemberton tried to invent a medicine. Pemberton wanted to cure for headaches. He mixed several ingredients together. No one knows exactly what he did. The mixture was a mystery, but tasted delicious. Pemberton took the mixture to a drugstore. The drugstore sold the medicine as a drink for a few cents a glass. Pemberton and a partner started a company to make and sell the drink. However, the business didn't make much money. Then a smart businessman named Asla Candler bought the company. Candler made the business much more successful. The company grew, and it sold the drink around the world. What happened to the mysterious headache cure? It's now a global product. It's one of the most famous brands in the world: Coca-Cola! The Coca-Cola Company markets the drink in 200 countries. It sells more than 1.6 billion drinks every day.
